

Nanomaterials for Technology Workshop: Theory Meets Experiment

Location: University of Strathclyde

Organisers: Karen Johnston and Paul Mulheran

Dates: 20-21 June 2016

This 2-day workshop aims to bring together modellers and experimentalists to encourage new collaborations in the field of nanomaterials and their technological applications. The workshop will be held in the new Technology & Innovation Centre, University of Strathclyde, opened in 2015. Topics include but are not limited to:

- functionalised nanoparticles
- porous and bioinspired materials
- surfaces and interfaces
- multiphase and colloidal materials
- nucleation, growth and self-assembly

Details about the talks and poster sessions will appear on the website at a later stage.

Registration Fees of 70 GBP per participant include conference dinner, lunches, and refreshments. Student bursaries may be available if funds allow. Please register on the online shop via the website above. Please state if you prefer to present a talk or poster, would like to apply for a bursary, and if you have any special dietary requirements. Deadline for registration and abstract submission: 30th May 2016

[More details.](#)

The organisers would like to thank CCP5, the Nanoscale Physics and Technology group of the Institute of Physics, and ARCHIE-WeSt for sponsoring this workshop.
